

Promoting the Growth Strategy

◆Choosing the most appropriate organizations.

The efforts made are based on the principle of “Private Initiative” and “Collaboration with Prefectural Residents and Companies”. The feasibility and priority from the perspective of local management will be considered, and the most suitable organization to conduct the project shall be chosen.

◆Evaluating cost and benefits.

Considering the harsh fiscal conditions of Osaka Prefecture, costs and benefits before undertaking a project will be carefully examined.

◆Appealing to the national government.

Every opportunity to talk with and encourage the national government for projects that require legal amendments and the creation of systems at the government level will be taken.

◆Providing appropriate progress management.

The systems in the Osaka Prefectural government will be improved and strategies will be steadily promoted. Growth targets and achievements will be constantly monitored and the results will be published on the Internet or through other media.

◆Conducting reviews in a flexible manner.

Activities will be reviewed in a flexible manner according to changes in the social and economic conditions.

The photos in this brochure have been provided by many people, including prefectural assembly members.
